Understanding Domestic Retrofit

Cskills Awards Level 2

Why this course would benefit an employer?

This qualification is vocationally based, and it aims to introduce employees to the retrofit sector of the construction industry. Successful completion of the qualification will provide employees with knowledge and understanding of the principles of retrofit. It is focused on the building insulation aspect of retrofit.

FREE
to businesses across
**Chesterfield and
North East Derbyshire**

Modules on the course:

- Be able to interpret domestic retrofit information specific to the work activities and resources.
- Be able to interpret health and safety information.
- Be able to identify the materials required for work activities in domestic retrofit.
- Be able to identify the risk of damage to the work and the surrounding area.
- Be able to understand the basic principles for domestic retrofit installations.
- 6. Be able to understand how to carry out basic domestic retrofit installations

Assessment of this unit will be through the completion of a mandatory knowledge assessment (multi-choice questions).

As a result your employees will...

This Level 2 qualification provides employees with an overview of domestic retrofit of insulation to buildings. It will cover; information used, the health and safety considerations, the resources used, the risks of damage, contractual requirements and the processes involved as part of retrofit activities.

Progression Opportunities:

The design of the course is focused on providing the employee with the opportunity to gain knowledge and understanding to assist with progression onto the NVQ Level 2 or Level 3 in Building Treatments and Insulation or into employment in the retrofit sector of the construction industry.
