9am-4pm

An introduction to Air Source Heat Pumps

Why this course would benefit an employer?

This course will enable your employees to develop an understanding of air source heat pump technology to enable anyone who will oversee, sell, advise, install or commission the systems.

FREE

**to businesses across
Chesterfield and
North East Derbyshire**

Modules on the course:

With access to a wide range of equipment, you will receive an overview of applications, sizing, mechanical and electrical requirements, installation diagrams, control systems, commissioning and basic fault finding.

As a result your employees will...

Understand the technology behind Air Source Heat pumps. They will be able to discuss the sizing of the equipment, what the mechanical and electrical requirements are and understand what is required to install, commission and fault find.

Progression Opportunities:

This course would be an ideal starting point for any employee with no prior knowledge of Air Source Heat Pumps before moving on to our BPEC Level 3 Award in Air Source Heat Pump Systems (non-refrigerant Circuits) .
