

## Automotive

**Keeping Britain moving is a vital part of our future, to prepare for a career in the industry join one of our courses.**

### Did you know?

**The team boast vehicles that are both electric and hydrogen powered, preparing students for the future industry.**

Vehicle Technology encompasses everything at a function/mechanics level with a car.

Courses at all levels give you hands-on, practical experience working with the latest vehicle technology, which is invaluable when entering full-time employment.

At Chesterfield College, we benefit from strong links with a number of employers in the vehicle automotive sector, meaning we know the skills they are looking for.
