

Building Services

**Want to help provide water and electricity to buildings?
If so, then a career in Building Services is for you.**

Building Services includes plumbing and electrical installation. These two career pathways are in high demand with lots of employment opportunities available locally.

You can progress into apprenticeships and employment with a wide range of employers who we are proud to have fantastic working relationships with. With expert tutors with years of industry experience

and tailored facilities to replicate real working environments, we offer the perfect way to start your plumbing or electrical installation career.

You will learn skills in the classrooms and workshops at college. We also help you to gain valuable experience in the world of work experience and live projects wherever possible.

Did you know?

Our industry contacts help our students to gain a real insight into the world of work.

We have a range of local, national and international employers exhibit and network with our learners.

"I did my Plumbing Level 1,2 and 3 at Chesterfield College. Half way through my Level 3 course I applied for the Technical Coach position, not really sure what it was about but I thought the worst that could happen was that I'd get turned down. It went so well, they followed me out of the interview and offered me the job. I was so happy."
